What is Trac Software?

Trac is easy-to-use software, created to record yearly spray and fertilizer treatments. From the master spray data sheet, Trac automatically generates the EPA WPS Central Posting and other reports.

Trac software is based on Cornell University Pest Management Guidelines, which are updated yearly.

How does Trac work?

Those familiar with working on a spreadsheet will find it easy to use Trac Software, since it is written in MS Excel, a popular spreadsheet program. Very simply, the user “fills in the blanks.” There are data entry worksheets, much like sheets of paper. One sheet asks for basic information, such as name and address. Another sheet allows the user to enter their spray information, such as the spray date and chemical used. From the data entry worksheets the program automatically fills in the processor, DEC, & EPA spray report forms.

How does Trac help?

Improves traceability, saves time and prevents errors!

Trac has “drop down” lists for pesticides and pests that you can select from. When you select a pesticide Trade Name from the drop down list the software automatically fills in the EPA registration number, REI, PHI and calculates the earliest harvest date. The software also generates drop-down lists specific to your farm or business operation. And it will automatically fill out a NYS DEC applicator annual report and an EPA WPS Central Posting form.

Who developed Trac Software?

Juliet Carroll, Fruit IPM Coordinator, NYS IPM Program developed Trac Software. Jennifer Grant, Community IPM Coordinator, coauthored Trac for Turfgrass.

Funded by:

NYS Dept of Agriculture & Markets
The NY Wine & Grape Foundation
Constellation Wines, U.S.
NY Agriculture Innovation Center
NYS Turfgrass Association
NYS IPM Program

Trac Software available:

For Fruit

TracApple

TracPear

TracGrape

TracBerry – berry crops

TracStoneFruit – peach,
nectarine, plum, and apricot

TracCherry – sweet and tart

For Turfgrass

TracSod – sod farms

TracGolf – golf courses

TracLawn – lawn care

TracGrounds – grounds and
athletic fields

Hardware and software needs?

- Microsoft Excel
 - PC up to Office 2007
 - Mac up to Office 2004
- Printer

Will not run on Mac Office 2008

How to Obtain Trac Software

Information on obtaining Trac software is available online at

nysipm.cornell.edu/trac/

Record-Keeping & Reporting Software

Developed by the New York State
Integrated Pest Management Program

Trac Software

For Fruit

*TracApple, TracPear,
TracGrape, TracBerry,
TracStoneFruit, TracCherry*

For Turfgrass

*TracSod, TracGolf, TracLawn,
TracGrounds*
